C.C.F. AS THE WAY OUT

Wm. Irvine, M.P., Preparing Way For New Social Order.

A crowd of about 100 turned out to hear Mr. Wm. Irvine, M.P., at the annual meeting of the Hierarchy to Granger Dist. Assoc. U.F.A. For over twenty years Mr. Irvine has been making the trail of a new social order, and the amount factors and illustrations that he now has at his finger-tips is intensely absorbing. He is a fast speaker, uses no unnecessary words, indulges in no flights of fancy, and for two hours poured out such a stream of such intensely interesting matter that we can only record the high spots.

His subject was the C.C.F.—the new social order as exemplified in the policy of The Co-operative Commonwealth Federation.

Speaking of the depression, we have as yet only measured it in terms of dollars and cents—we must also measure it in human values—in the failure to provide a place for the armies of young people who are annually being prepared for the work of the world.

Our present Capitalist system, sometimes called the industrial and sometimes the machine system, was started some 150 years ago and the other systems of the past will, in the ordinary course of human evolution, come to pass in some other form better fitted to our changing needs. There was no cause for alarm in this was the natural course of human development.

Mr. Irvine made himself quite clear in regard to the progress of the world and the conditions, with which he was entirely out of sympathy. If a man had not come enough to see the battle, he was not to be treated with a bomb.

Emphasizing the need for reconstruction, he pointed out the reason why the Capitalist system could no longer be patched or bolstered up. First it would force markets every other country needs the same. Second, it needs a safe place to invest its surplus cash—there are no more safe places. Third, it was built for the form of an inherited personal wealth, which has been a small amount of gold, with very increasing debts or credits added on that small foundation. It must topple over sooner or later.

Capitalism, said he, has been used in its history to do good, but it is not its job. It was like a cream separator—the product goes in the milk, the worker turns the handle, the cream rises, his mouth under the cream spout, while he waits to be content with the cream milk.

Speaking of the C.C.F. and its aims, Mr. Irvine indicated that it had, as yet, no established program and it had not yet been fully exposed. But, recognizing the influence of party politics, and the unorganized condition of farmers and working men over the Dominion, they were trying to consolidate under the C.C.F. into one unit of power. He did say, however, that if they came into power they would take away from Capitalism all its power over production and distribution. The banks could retain all their live holdings, etc., but they would take away from them all control over the medium with which they worked—money.

The address was a very clever and entertaining picture of the general condition of the world, and Mr. Irvine had no particular remedies to offer, but he particularly emphasized, they were blazing a trail along which they were struggling painfully and slowly, but over which they hoped their children's children might travel with comfort and safety.

There was some regular annual meeting business transacted, together with several resolutions passed, which, owing to lack of space, we are leaving over until next week.

Eamon De Valera Serves Notice To Ban Oath Of Allegiance

London, Irish Free State Press.—Lord Dawson de Valera announced that he had tabled notice of motion to commit to the senate his bill abolishing the oath of allegiance to the British crown. This means the bill introduced beyond recognition last year by the senate, will become law automatically after 60 days in its original form if the government general signs it, and it appeared likely he will.

His notable comparable interest was manifested in the country regard-
ing the absence from the new cabinet
of James Goughgouan former minister

Mr. Dougherty explained this to the *Washington Post* by saying he had accepted a cabinet post last year only on condition he would be released from office at the earliest opportunity. "This office," he said, "could a sacrifice of my considerable legal practice. I do not propose resigning my post in the deal room; and I will retain intimate relations with the cabinet. I have of course ambitions toward the bench."

People Being Regenerated By Monkey Gland
Gland Says Belgrade Doctor
It will soon be possible for men to live and retain all their faculties until they reach the age of 100. This is the considered opinion of the Dr. Serge Voronoff of "monkey gland" fame who is a Belgrade scientist.

Altho' Dr. Voronoff has almost entirely given up work on the rejection of man by the grafting of glands, and has now devoted himself to the study of cancer, he claims to be in touch with thousands of his pupils. These medical men are recommending people according to his system in all parts of the world.

It is wise to get the best example of the success of his system, which is neither dangerous nor painful. Within a short time, he claims, every criminal land will have his monkey parties for raising the necessary animals to supply cheaply the great demand which will arise for glands.

Brain Uses Energy
Same As Muscles

Then After Exercising

The plain-and-simplest answer is no longer need carry his brain which would think behind a desk, for a hard-thinking brain was once energy as fast as a hard-working muscle, the American College of Physicians at New York said.

There is good reason to believe brains use up actual energy in thinking just as muscles do in working, though this is contrary to ideas formerly held, said Dr. Stanley Cobb, of Boston. It accounts for the fact, he believes, that brain-workers who lead a sedentary life often are more hungry after their usual mental work than after exercising in the open air.

A report of Dr. A. C. Ferguson, medical superintendent of sanatorium, presented at a meeting of the association of directors of the league showed 35 new patients under the care of the league at December 31 then at the same date one year ago.

As a result of the decrease in the number of patients together with reduced staff and salaries, the levy on urban and rural municipalities has been reduced by \$20,000 for 1933.

Boosted Tourist Class Traffic

Many Unemployed Returned To Europe During Last Year

Tourist and third-class trans-Atlantic passengers travelling from this continent to Europe showed an increase in 1933. This is partly due to the fact, it is learned, that many unemployed people have returned to their former homes in Europe, where living costs are said to be lower.

Passenger traffic as a whole, decreased considerably between North America and Europe, the total decrease being 68,553, of which 57,847 represents the decrease of traffic between United States and European ports.

Grave Is Dubious

Think Persian Ship Sunk 2,412 Years Ago Cannot Be Buried

Greeks scoff at the idea that an Italian company was successful in raising the 907 Persian ship sunk in the battle of Salamis 2,412 years ago.

Italian salvagers, they admit, raised the galleys of Caligula in the Lake of Nemi, but they did it by draining the lake. An Italian company also fished up a Venetian galle ship sunk in the harbor of Rhodes 400 years ago.

But there is a big difference archeologists assert, between this work and the job of bringing the fleet of Xerxes to the surface. The bay of Salamis is of great depth, while they say lake Nemi is comparatively shallow.

Top prospects this spring are not least the ground being saturated with moisture. We have had several showers already and it looks like a wet season. Looking over the spring, the spring - expect to be less than last year. The season is getting late, but a late spring generally means a good crop.

The outlook for better trade relations with the United States continues to improve. If they take our cattle season stock raising in Alberta will get a good boost. Our prosperity will not need to rest on a bubble.

The local Elks are preparing for his degree in town on May 13th. Posters are being put out.

The Red Deer radio station is to be closed down. With the government's increased activity in the broadcasting business, there is a danger of not having enough on the air, but we wish the Commission would stick to our national song on a little more.

The mailman on Tuesday was well patronized, several cars at country churches coming in. Got. Mair's sign should have been 25 a pair, we had it 15 by mistake.

AN OPEN LETTER TO THE WHEAT GROWERS OF THE THREE HILLS DISTRICT

Local Grain Buyers and their families are part and parcel of your community, and as such they, for their interests in the community and their interest therein, help make it a success and add to the advantage of community life and gatherings.

The elevator which they are in charge of, are contributing to the community by way of labor and purchase for local help, repairs, expenses, etc. The local grain companies to assist your school and the upkeep of the town to approximately \$20,000 annually. They also patronize the stores, hardware, and meat, hotels, restaurants, etc., and, to the extent of a day's work, they, your local grain buyers, contribute approximately \$12,000 annually, are also spent among local business houses, and local farmers for their products, as well as among the various organizations and institutions of Three Hills. This all helps the community.

Unless they do a reasonable amount of business, to the end the elevator will be closed, with the buyers who go with it and consequently to the community.

Elevator operators have proven to be an essential part of the marketing, and it is necessary to the successful success of the crop.

They have agreed to have all the marks of a Fly-By-Night business concern. They are here to-day, with no investment, no capital, no interest in the community, and are gone to-morrow, without to respect in the same spot. These business is being conducted in a more or less illegal, yet vague promises of extra returns, price, etc. In such buyers or commission houses every dollar or amount your schools, churches, sports, etc.

Judging by rumors from some producers who have patronized the truck layer in the past, many retro-actments for outside sold to these firms fall short in dollars and cents of what these same farmers would have received had they patronized the local elevator. It is like a farming town without an elevator or warehouse to sell your local products or to carry on the business, without any local grain buyers or their families to buy your farm vegetables, etc., and to which a truck of strangers come in the fall with a small load of sales talk to entice you to shovel your grain into a low car, guaranteeing you, say, weights, no grade, and with no one to air your complaints with—then patronize the truck layer.

The undersigned respectfully solicit a share of your business, and place all the facilities and experience of the organizations which they represent at your disposal. You can deal with any of them with absolute confidence.

SECURITY AND PROTECTION

Grain Growers, the length and breadth of Alberta, should keep in mind that a fair measure of protection and security in the sale and handling of their grain can be obtained through the building up of a strong elevator system on a strictly government-controlled co-operative basis. Having this in mind, the best course to follow is to:

A decision of supreme importance in the production companies of Turner Valley was given this week by the Supreme Court of Can. The court has decided that Turner Valley Conservation Act is illegal, on act which has played such havoc with the revenues of the oil companies. The Spence Company, which holds its lease from the Don J. Co., had appealed the power of the Alberta Government. If the decision holds, it is probable there may be many heavy claims for compensation for loss of revenue from other companies in similar position.

An incident was noticed this week as illustrating the trouble which has been attacking last year's stored wheat. Two little tots had climbed up on to the roof of a shed to play when down fell the smaller one landing square on her back across the trunk of a ladder reared against the barn. Another's new budget is the first price of sleep towards more of inter-Imperial trade. British Columbia in particular will benefit.

Under the management of Military authorities, single sets of work men are being taken from Calgary to work camps in B.C. High trains were bringing men into Calgary from all directions and a very serious situation was developing.

There appears to be an avalanche of optimistic propaganda coming out of the past three days, just to make us believe that prosperity is almost here when 'We'll believe it all when we see what a little graver the price is ought to be.

A big headline in the daily this week that "an alleged murderer, being tried for his life had only received two weeks' education." How lucky it was he didn't get any more!

A REMINDER

A few years ago, thousands of Alberta farmers petitioned and asked for the building of Alberta Pool Elevators. As a result the Pool system covers the Province in a close network. The same reason which inspired grain growers to ask for the service and protection of this co-operative system of elevators suggests that patronage should continue to be extended to them on a generous scale.

British Market Available

Crunch Could Turn 1-2 ton Trade

The adjustment of the British market, on one hand, would seem to strengthen the Canadian position. Great Britain, important customers of frozen poultry, has been only recently able to resume its trade with Canada. It has taken advantage of this to buy the whole of the frozen poultry trade before the "Christmas" trade, but has not been able to get it going. There has been no trade in frozen poultry since the end of the year. The British market is now open to the Canadian trade, and it is expected that the trade will be a good one. The Canadian trade is now open to the British market, and it is expected that the trade will be a good one.

Democracy vs. Dictatorship

One of the most fundamental and profound differences between democracy and dictatorship is the attitude of the people towards the government. In a democracy, the people are the sovereign, and the government is their servant. In a dictatorship, the government is the sovereign, and the people are its subjects.

The first way in which democracy and dictatorship differ is in the manner in which the government is formed. In a democracy, the government is elected by the people. In a dictatorship, the government is imposed upon the people by a single individual or a small group of individuals.

Secondly, in a democracy, the government is limited in its powers. In a dictatorship, the government is unlimited in its powers. The dictator can do whatever he pleases without any check or balance.

Thirdly, in a democracy, the rights of the individual are protected. In a dictatorship, the rights of the individual are trampled upon. The dictator can take away the property, liberty, and life of his subjects at will.

Fourthly, in a democracy, the people are educated and enlightened. In a dictatorship, the people are kept in ignorance and superstition. The dictator fears that an educated people would overthrow him.

Fifthly, in a democracy, the people are free to express their opinions. In a dictatorship, the people are silenced. The dictator punishes anyone who dares to speak against him.

Sixthly, in a democracy, the people are united. In a dictatorship, the people are divided. The dictator creates a class of enemies and a class of favorites.

Seventhly, in a democracy, the people are happy. In a dictatorship, the people are miserable. The dictator lives in luxury while his subjects live in poverty.

Eighthly, in a democracy, the people are free. In a dictatorship, the people are enslaved. The dictator rules with an iron hand.

Ninthly, in a democracy, the people are respected. In a dictatorship, the people are despised. The dictator looks down upon his subjects.

Tenthly, in a democracy, the people are loved. In a dictatorship, the people are hated. The dictator is a tyrant.

Eleventhly, in a democracy, the people are free to choose their government. In a dictatorship, the people have no choice.

Twelfthly, in a democracy, the people are united in their love for their country. In a dictatorship, the people are divided in their loyalty.

Thirteenthly, in a democracy, the people are free to live their lives as they see fit. In a dictatorship, the people are forced to live as the dictator wishes.

Burgess Unable to Appear Will Meet Smith Here Later

There was a big crowd at the fight last night, although the news that Burgess would not appear on stage to receive his prize was considerable. A substitute was sent in by J. Davis who though not in training and put up a pretty stiff defence. He was knocked down in the sixth and his seconds told him to lay there. He had done good enough. It was announced that Burgess and Smith would finally meet in Three Hills next month. In the 10th fight last the latter was knocked out in the fourth. The fighters both started in strong, but when Fox opened up in the third the west round finished him. In the Bill McKinley - Shelly fight the Three Hills boys again scored. It was a great night for Trechn Shelly, three in the towel at the fourth, having already been floored twice for a count of eight. In the Three Hills bout Phipps and Freeman, Phipps showed much better knowledge of the game and was given decision in the fourth round. The show opened with a little fun when five boys, handpicked, posed in a general mix-up. Excited for the above irreconcilable disappointment Mr. Almonth is to be congratulated on the well organized and successful exhibition he had, after a great deal of work, got together.

Mr. and Mrs. Rheimer were among the earliest residents here, having operated a boarding house near the Ford garage, which was later burned down. Deceased leaves his widow and two daughters and four sons.

Mixed Variety Seed Wheat Causes Big Losses

Out of sixteen local samples of 1933 wheat sent to the experimental station this year, only two samples were classified as good seed. Six fair and six bad, mostly of the same variety. Much of the low grade is directly due to poor, badly mixed seed, all of the different kinds, good and bad, being found in some samples. Besides the loss from inferior milling quality of mixed grain, there is trouble and loss from difference in times of ripening, in length and strength of straw, etc. The Seed Grain Co. has arranged a plan whereby farmers can exchange their grain for pure variety, tested seed.

THE Christmas Spirit

Last Christmas we noted that it was almost a joke in respect to be merry with the bottom dropped out of almost everything. Just after another year has rolled away, things are better than they were last year. There is a little streak of light appearing on the horizon, no doubt about it if you look for it.

Love and peace are still needed and we cannot do better than repeat the few lines we gave on last Christmas—

It is a coming night to Christmas
And its time to show a smile;
To gather up your glances
And forget them for an hour
To sweep your heart of memories
That are better and untrue,
To recollect the days gone by
The friends that once you knew

The years are slipping by you
And its time to stop and think,
Have heaven's link be link
Then greet the ones remaining
With a message from the heart,
For its coming night to Christmas
And you ought to do your part.

Look For A Silver Lining

During periods of financial stringency it is natural that the whole of people here and all over the world are looking for the silver lining of the clouds of their economic distress. In fact the tendency is for people to dwell upon these things, but the outlook of optimism which prevails in the business community is an encouraging sign.

It may be said to represent a silver lining, but no matter in fact, as it is during periods of rapid development and general prosperity for the whole of the world, when the silver lining is not needed, but the majority of the people are optimistic and expectant of the future.

It is a fact that the business community is optimistic and expectant of the future, and this is a good sign, for it is the only way in which the business community can survive in the long run.

Farwell to Mr-Mrs Dakin

Quite a good number of both town and country people attended the farwell to Mr. and Mrs. A. Dakin sponsored by the U.P.A. in the Hills Hill Wednesday last. The evening was spent with cards after which lunch was served. A few words were given by Mr. H. U. Hargis, who presented a letter to Mr. Dakin on behalf of the U.P.A. Mr. and Mrs. Dakin have resided here for many years, and since the start of the U.P.A. Mr. Dakin has been one of its most energetic workers. Many friends will miss the family and all join in wishing the best in their new home. This left Friday for the coast, and will be away a week at any rate.

"...So that Our Visitors will be Sorry to Leave"

"If we are going to invite people to our country, we must be honest with them. . . . Country costs nothing and is one of our greatest tourist assets. . . . Let us not see strange strangers within our gates that it will be easy for them to come, pleasant for them to stay, and difficult for them to leave."

Let us not see strange strangers within our gates that it will be easy for them to come, pleasant for them to stay, and difficult for them to leave."

Have a beautiful country. We must keep it as a holiday land. We must not let it and its guests mean homes with only the barest necessities and the determination to come back again and again.

"We should be happy, in planning our own vacations, that they are known to discover and find it to be made in our neighboring provinces. Here we have one of the world's most popular playgrounds - let us learn to know better the rich variety of our land."

— will pay you to bring your hogs to Three Hills stock yards because you get local weights and local grades of government grade as desired and you get paid for your hogs when you bring them in. Also these hogs are sold on a competitive market and are sold to custom packers. \$30.00 was paid for hogs at Treble during 1934. It is to prove that satisfaction was given to farmers by the shippers who will look after your interests at all times.

There established experience has proven that these social services grow very rapidly and that expenditures highly increase. This experience indicates a real danger spot. It is this fact being an individual man and woman, who are not able to take care of themselves, that the community will, as a rule, protect, exercise some degree of thrift, and save against old age and old age. In a word, self preservation will be one of the guiding values of their life. But once it becomes an accepted and established fact that people will be provided for whether they are at work or not, that the community will take care of them, that the community will take care of them, the community will spend them throughout their old age and bury them when they die. Thus there is a grave danger: that the incentive which is now the great driving force in our human nature will become less keen, weaker.

New Process of Pre-Seeding Gives Promise of Doubling Yields Of Crops In Western Canada

Threats of longer days to develop the new pre-seeding method were given to the farmers of the grain belt by the University of Alberta, Edmonton, when it was announced that the University of Alberta, Edmonton, has developed a new process of pre-seeding which promises to double the yields of the grain belt in Western Canada.

The new process, known as "pre-seeding," was first developed by the University of Alberta, Edmonton, and is now being tested in the field.

The new process is based on the principle of pre-seeding, which involves sowing the seed in the soil before the main crop is planted.

But when those giving a degree of confidence to the existing order are so united that necessary reforms can be brought about to correct the evils which exist, it is almost as if they have nothing to be reformed upon. If there were no "reformers" but only "reform" I think it doubtful people are prone both to question the necessity of reforms and to do so with confidence. The "reformers" will be brought to break the "reformers" and will go to the head of the fast-track method or forced out of business after they have been taken to a New Deal but it will be initiated and ended by a New direction.

Inventor Tells London Audiences Vertical Flying Is No Longer A Fictitious Dream, But A Reality

Vertical flying is no longer a fictitious dream, but a reality, according to the inventor of the vertical flying machine, Dr. J. J. Moore, who is now in London, Ontario, Canada, for the purpose of demonstrating his invention to the public.

As a matter of fact, Dr. Moore has already demonstrated his invention to a large number of the scientific community in London, Ontario, Canada, and he has received many orders for the machine.

Dr. Moore's invention is a vertical flying machine, which is a combination of a glider and a motor. It is a simple machine, which can be used by anyone, and it is a machine which can be used for many purposes.

Alberta Savings Certificates

A SOUND FORM OF INVESTMENT

By purchase of Savings Certificates, the Province of Alberta has for many years afforded opportunity to the public for investment of their savings at attractive interest rates, at the same time enabling the Province in maintaining public services vital to the welfare of the people.

In addition to the many "Personal" contributions available to donors, individuals of \$1 and upwards the Government in 1932 reorganized them. Certificates were a fixed rate of interest for a period of one, two, or three years. The holders of these certificates are all entitled to the same interest as the Provincial Bonds. These certificates are available in various denominations from \$1 to \$100 and are not subject to the varying market prices for Government Bonds.

4 1/2	per annum will be paid on certificate value in two and three years.
3 1/2	per annum will be paid on certificate value in one year.
3	per annum will be paid on certificate value on demand.
